Aurora X2 Wireless Headphones - User Manual

Thank you for choosing the NovaTech Aurora X2. This manual covers setup, everyday use, battery care and troubleshooting.

In the box: Aurora X2 headphones, USB-C charging cable (1 m), 3.5 mm audio cable, carry pouch and quick start guide. The hard Aurora X2 Carry Case is sold separately.

Specifications: Bluetooth 5.3 with multipoint (two devices at once); codecs SBC, AAC and LDAC; 40 mm dynamic drivers; weight 250 g; charging via USB-C.

Pairing and connections

First-time pairing: with the headphones off, press and hold the power button for 5 seconds until the LED flashes blue and white. Select 'Aurora X2' in your device's Bluetooth menu.

Pairing a second device: open the NovaTech app and enable Multipoint, then repeat the pairing steps on the second device. Audio switches automatically to the device that starts playing.

Wired mode: plug in the 3.5 mm cable. Wired mode works even when the battery is empty, but noise cancellation requires battery power.

Noise cancellation and controls

Press the NC button on the left ear cup to cycle between Adaptive Noise Cancelling, Transparency and Off. Adaptive mode adjusts to your surroundings every few seconds.

Touch controls on the right ear cup: double-tap to play/pause, swipe forward/back to skip tracks, swipe up/down to change volume, touch and hold for the voice assistant.

Wear detection pauses playback when you take the headphones off. You can turn it off in the NovaTech app.

Battery and charging

Battery life: up to 40 hours with noise cancellation on, 55 hours with it off. A 10-minute quick charge gives about 5 hours of playback. A full charge takes 2 hours.

Use any USB-C charger rated 5 V / 2 A or higher. The LED glows amber while charging and turns off when fully charged.

For long-term storage, charge to about 50% every three months to protect the battery.

Troubleshooting

Sound only in one ear cup: perform a factory reset (press and hold the power and volume-down buttons together for 10 seconds until the LED flashes red three times), then pair again. If the problem persists, the unit may be defective - contact support.

Cannot pair: remove 'Aurora X2' from your device's Bluetooth list, reset the headphones and try again. Keep the headphones within 1 m during pairing.

Firmware updates: install the NovaTech app, connect the headphones and open Settings > Firmware. Keep the headphones above 30% battery during updates.

The headphones are not water resistant. Do not use them while swimming or showering.
